INDUSTRIAL FACILITIES.

House your business's lifeblood under an impenetrable fortress.

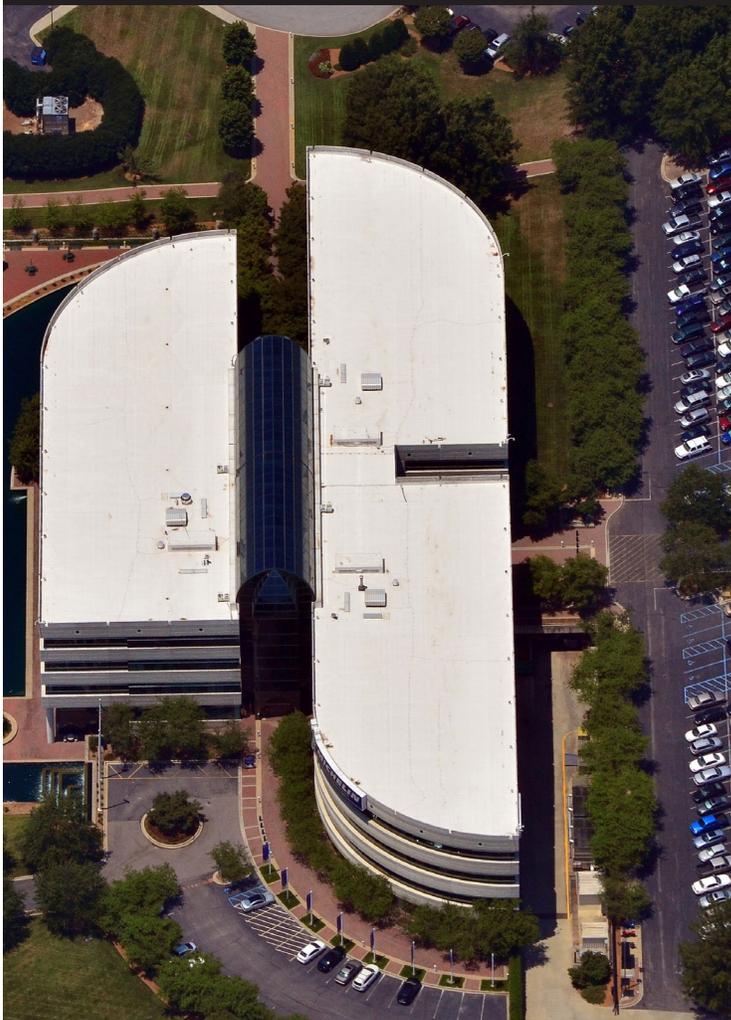

North American Roofing

The Most Trusted & Respected Roofing Company in the U.S.

800.551.5602 ■ naroofing.com

Industrial and manufacturing facilities have roofing issues that aren't always easy to see. Sometimes, they need obvious protection from the elements. Other times, it's invisible off-gassing from the manufacturing process inside. Housing large, expensive equipment used to produce your products is sometimes as important as the products themselves. You may also have specialty equipment on the roof deck that needs to vent manufacturing discharge. The right roofing system can help you mitigate all of that, including extreme heat and humidity—while you enjoy the long-term cost benefits of having a roof built to endure extreme environmental and mechanical conditions. Let us assess your facility's needs and provide a solution engineered to protect your valuable equipment, what you manufacture or store, and your vital personnel. Call us today to learn more at 800.551.5602.

THE UNIQUE ROOFING CHALLENGES FOR INDUSTRIAL FACILITIES

At North American Roofing, we know what you face on a daily basis. Durability is likely an essential component of what you make or store, and the same is true of the roof that protects your business operations. The recommendations we make aren't universal; they're groomed to your specific environment and your manufacturing processes. We can provide solutions that offer superior wind uplift resistance and systems that work best where chemicals and oils are going to be present. Our comprehensive approach to designing your roofing system is meant to provide an economical solution with minimal disruption to your daily operations.

A SNAPSHOT OF OUR PROCESS

- Experienced engineering and technical professionals are available to collaborate and assist with writing and developing specifications unique to your facility.
- Comprehensive and itemized proposals are a part of every roof installation detail.
- Tiered levels of interior protection service help ensure no contamination to sensitive production or manufacturing environments.
- Real-time collaboration on every project through on-site project management.
- Accountability to provide the best customer experience with the industry's only customer action center—ensuring every project is completed to your expectations.
- Dedicated quality control and safety inspectors ensure a safe and secure work environment for your business and employees (ours, too).
- We're a nationwide contractor, approved and held in high regard by all major roofing manufacturers to provide commercial roof warranty systems and support.

SINGLE-PLY SOLUTIONS THAT MAY BE RIGHT FOR YOUR BUSINESS

While there are several roofing systems available to choose from, there has been tremendous growth in single-ply membranes. The three most common and dependable are EPDM, TPO, and PVC. EPDM is typically black and is a great long-term solution when durability in extreme environmental conditions is mission-critical. TPO and PVC are lightweight, yet highly durable as well. Their highly reflective qualities allow for the added benefit of reduced energy costs. And PVC is the superior choice for facilities where manufacturing processes include harsh chemicals and oil.

OUR SATISFIED CUSTOMERS

Below are just a few of our industrial and manufacturing facility references:

- GKN Aerospace
- Applied Industrial Technologies
- GE Appliances
