

Carlisle

ESP – Excellence in Single Ply (2018 Is the last time I see us listed)

- ESP was created to identify and reward a select group of applicators who consistently exceed Carlisle’s standards. Awarded annually, only the most accomplished applicators achieve ESP status. The follow data points are analyzed to determine ESP qualification:
 - Sales volume
 - Product mix
 - High-performance assemblies
 - Quality of workmanship
- More info here <https://www.carlisesyntec.com/en/Document-Viewer/excellence-in-single-ply-esp--program-brochure/5lgGyrAFcESYRpOTRd9Nug>

FleeceBACK Champions

- FleeceBACK Champions are a select group of Carlisle Authorized Applicators who are committed to installing Carlisle most durable and robust roofing systems – FleeceBACK EPDM, TPO, PVC, Rapidlock, and AFX membranes. FleeceBACK status is awarded based on yearly squares of warranted FleeceBACK membrane installed.

Hall of Fame 500

- Carlisle SynTec Systems’ Hall of Fame applicators set themselves apart from the competition through

their consistency and attention to detail. Hall of Fame (HOF) applicators are also knowledgeable about a wide variety of roofing systems and back their work with industry-leading warranties. Because only the most accomplished applicators achieve Hall of Fame status, this designation provides customers with confidence that they have partnered with the very best in the industry.

- A Carlisle Authorized Applicator earns a spot in the Hall of Fame once they receive 100 Perfect 10 inspection ratings from a Carlisle Field Service Representative. Hall of Fame – Centurion is the first level of this program and each level thereafter increases by 150 so the next achievement would be Hall of Fame – 250. An applicator earns Hall of Fame -250 status once they receive 250 Perfect 10 inspection ratings.
